GT105k-12/Z Kontrol Termometresi

The drawings, photos and graphics used are for illustrative purposes only.

Genel Açıklama

The control thermometer is designed for cooperation with RADWAG moisture analyzers. It enables measuring drying temperature value using a probe mounted on a cable. The GT105k-12 series features fully waterproof housing and a switch-off function preventing accidental discharging of the batteries. Power supply by batteries 3×1,5V (LR44). Optionally, the thermometer is available with a calibration certificate.
