X-ray Detector Easy Scope 600

The drawings, photos and graphics used are for illustrative purposes only.

Caratteristiche generali

EasySCOPE detectors are advanced solutions intended for detection of contamination in pre-packaged food products.

The detectors feature X-ray which enables to detect not only metal contaminants but also wooden or plastic residues.

EasySCOPE detectors are available in two versions: for up to 400mm or up to 600mm wide products.

Area of use: Food industry, Cosmetics industry, Chemical and pharmaceutical industries, Functions: Product quality control, Reliable detection, Supervision over production line, Customer protection, Instruments protection. Features: Precise X-ray detection system for detecting contaminations that cannot be sensed using conventional induction sensors, Conveyor integrated with the equipment, Remote operation, Possibility to connect warning system and contamination separation system.

Technical drawing showing the front view of a machine. Dimensions are indicated in millimeters (mm). The overall height is 1500 mm. The width is divided into three sections: 241 mm on the left, 838 mm in the middle, and FH ± 50 mm on the right. The total width is FH + 838 mm. The height is divided into four sections: 450 mm (top), 600 mm (middle), 450 mm (bottom), and 556 mm (right side). A dimension of Ø 60 is indicated for a hole on the right side.
