Discover 5Y

The lowest minimum weight of 0.3 mg,
achievable with modern weighing module.

Such a large chamber, yet still very accurate balance

Work with different labware in a chamber
space of 199 x 157 x 218 mm.

Ionizer

Do you have an electrostatic sample
that cannot be weighed? The ionizer will
neutralize its electrostatic charge.

Give 5Y a command, and it will carry it out

A set of actions ready to be performed
upon detecting a voice command.

Kensington Lock On/Off

Sample weighed? See the measurements on your computer

Available interfaces: 2 x USB-A, USB-C
(Free Link), Ethernet, Wi-Fi®, Hotspot.

Uncompromising user verification

Fingerprint reader.

One look and everything's clear

It couldn't be easier: the backlight colour informs you about status,
process results, procedures, or alerts.

Tool-free disassembly of the weighing chamber

Contaminated weighing chamber? You don't need any tools to disassemble and clean the 5Y weighing chamber.

Terminal tilt adjustment

RFID

Always the correct choice of a product or ingredient for a formulation.

5Y works with RFID tags that can be used to tag your products or formulation ingredients in the database. It can also be used to identify a user.

Hotspot

No space in your fume cupboard or access to the weighing terminal (glovebox)? Or maybe you want to operate the balance remotely?

Thanks to the hotspot, you can operate the balance on any device previously connected to it. This can be a smartphone, tablet, or computer.

Widgets

Always at hand, grouped so that the essentials never slip away.

Up-to-date information on ambient conditions

Real-time statistics from a series of measurements

Looking for More than Just Weighing?

Basic working mode that displays the mass of a sample.

Parts counting

Quick counting of samples of similar mass.

Checkweighing

Control of sample mass in the set min/max thresholds.

Dosing

Weighing to a target value.

Percent weighing

Percent mass control.

Density

Determining the density of solids and liquids.

Animal weighing

Control of mass change over a set period of time.

Formulations

Weighing of predefined ingredients, according to the order described in the formulation.

Statistics

Real-time statistics determined from carried out weighings.

Pipette calibration

Checking piston pipettes according to customer-specific requirements or ISO 8655.

Differential weighing

Analysing the change in mass of a single sample over time.

SQC

Statistical mass control with set thresholds.

Peak hold

Control of the maximum mass on the pan.

Mass control

Statistical control of samples of similar mass.

Comparator

Control of mass standards.

PGC

Statistical mass measurement in accordance with Packaged Goods Control.

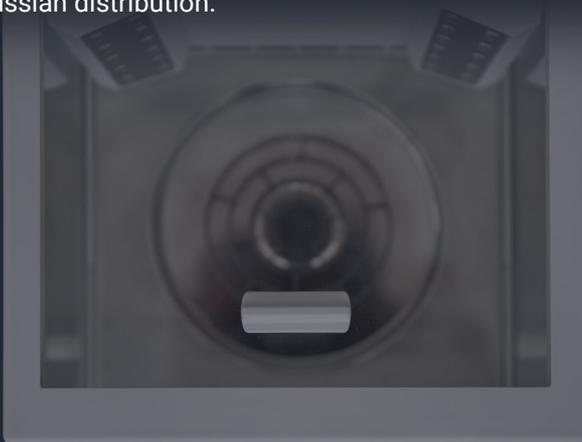

Note Down Your Conclusions

One of 5Y' innovative features is the ability to add a voice or text note to a series of measurements or a procedure report.

Do You Like to Analyse Data From a Series of Measurements Presented Graphically?

The balance gives you this possibility. You can choose between graphs of measurement series, ambient conditions, SQC with thresholds, and Gaussian distribution.

DWA - Digital Weighing Auditor

Have you ever wondered if your balance is ready for work?
The Digital Weighing Auditor makes sure it is.

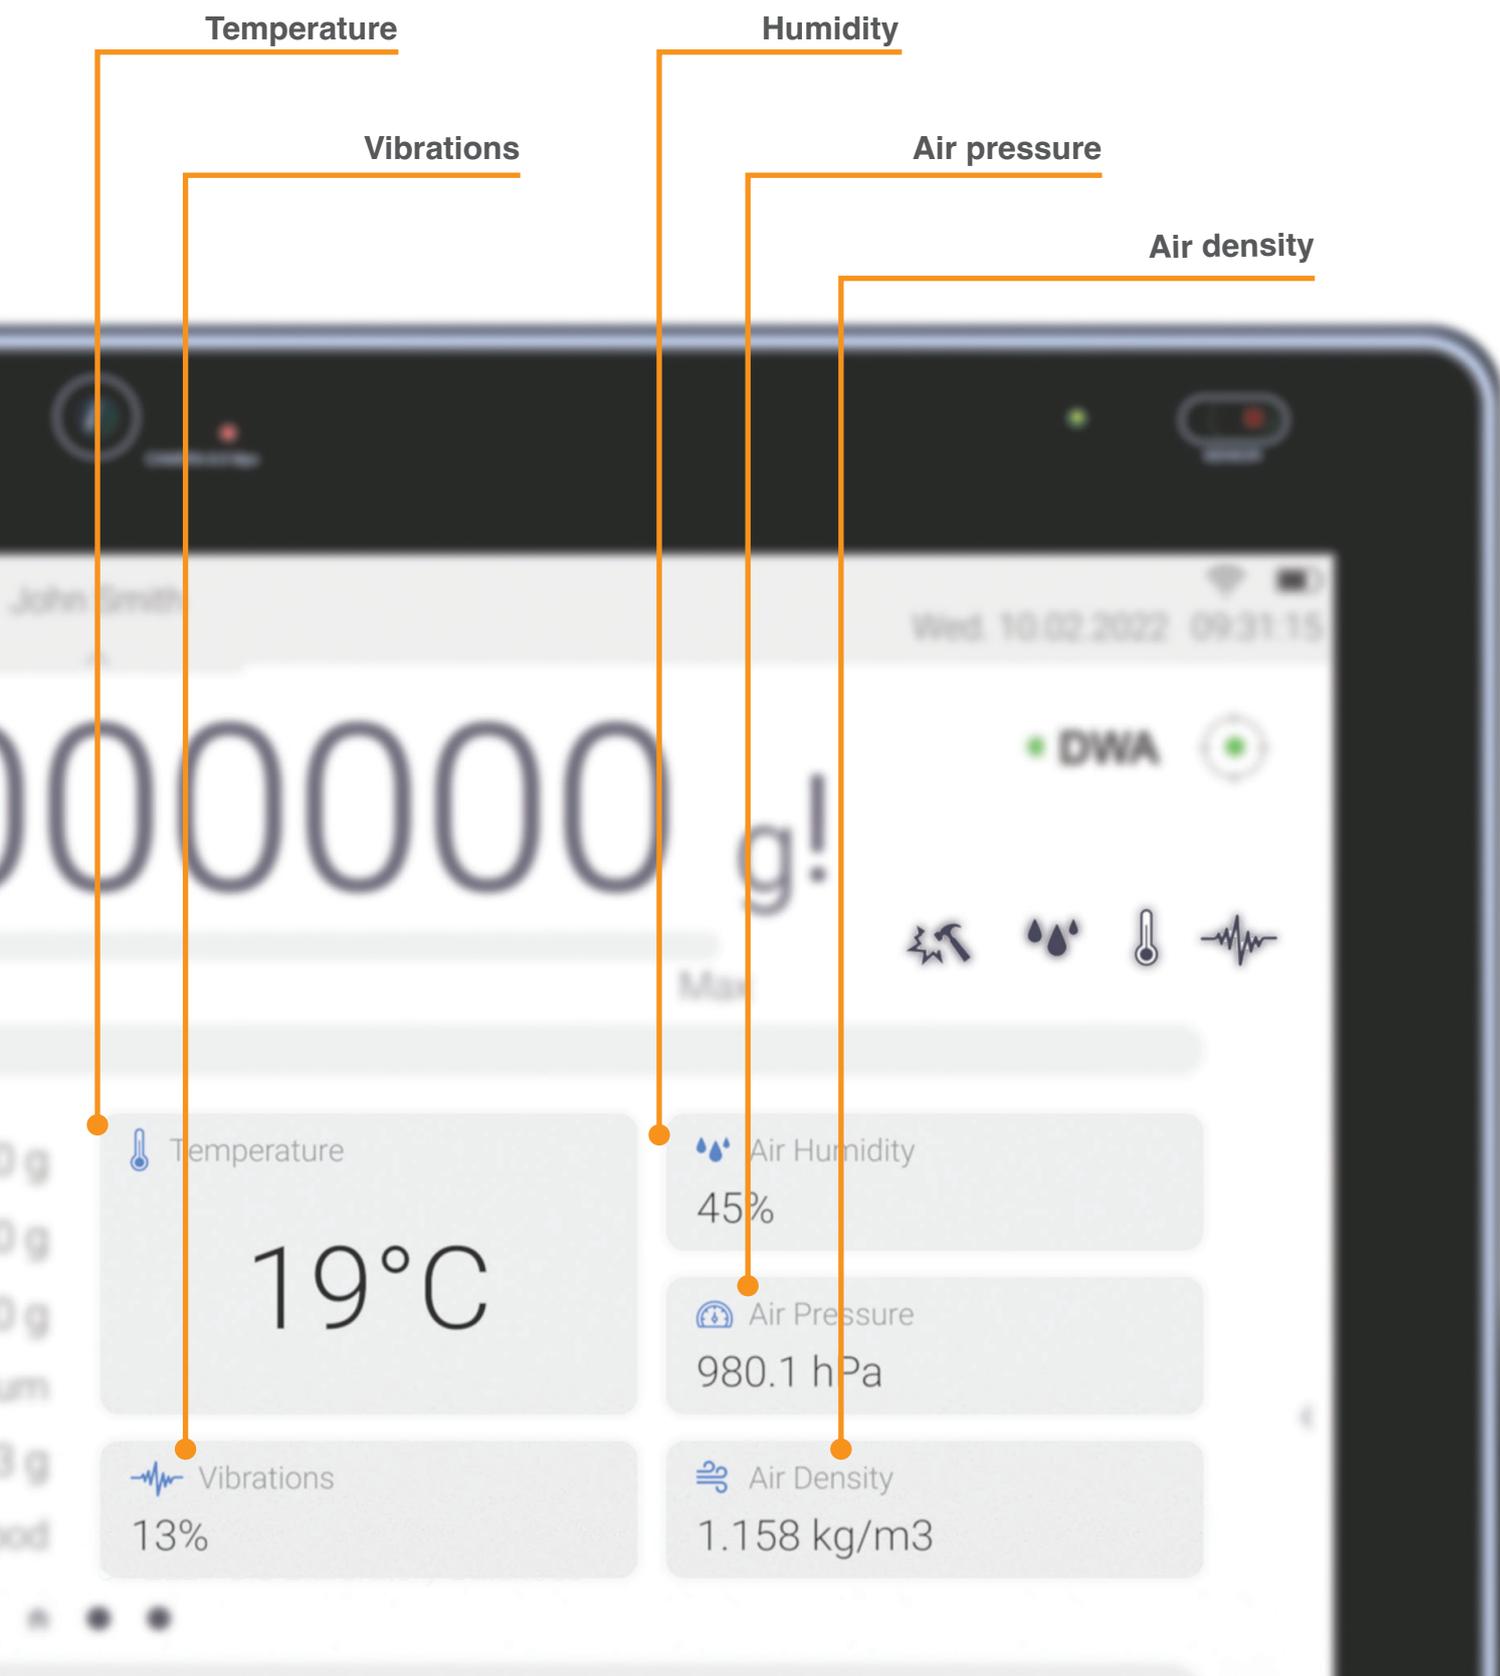

DWA is a system that monitors ambient conditions (temperature, humidity, pressure, and vibration), balance levelling, adjustment, USP compliance, and ionizer operation. It enables air buoyancy compensation in real-time. What is more, it signals the need for a balance inspection or a periodic audit of the balance's accuracy and sensitivity. 5Y signals the results of the digital audit via Ambient Light, pictograms on the home screen, or a speaker.

- DWA

Are the Conditions in Your Laboratory the Best for the Balance You Have?

5Y monitors temperature, humidity, pressure, and vibration. The results are displayed as graphs or a widget on the home screen. Unsuitable conditions for the balance are signalled by DWA. And all of this is recorded in a dedicated database.

What Was the Value of the Previous Measurement?

5Y always displays the history of the last 20 measurements on the slide-out panel. It is also here where the measurement series ready for e-signature, in accordance with 21 CFR Part 11, can be found.
